## 2014 International Young Scholars Systems and Synthetic Biology Symposium

Beijing, June 23-25, 2014

Venue: 101 Lecture Hall, Jinguang Life Sciences Building,

**School of Life Sciences, Peking University** 

(By the east entrance of Peking University, near the intersection of Chengfu Road and North Zhongguancun Street)

Homepage: http://cqb.pku.edu.cn/meeting2014/

## Day 1 (June 23, 2014)

Morning Sessi	on				
_	Coordinator: Yuhai TU (涂豫海)				
Time	People	Activities/Title			
8:50-9:00	Chao TANG	Opening Remarks			
9:00-9:30	Ling-chong YOU	Synthetic Biology and the War On Bugs			
9:30-10:00	Cheemeng TAN	The Engineering of Synthetic Biological			
9.30-10.00	Cheemeng IAN	Systems by Harnessing Functioning			
		Principles of Natural Cells			
10:00-10:30	Coffee Break	Trinciples of Ivaluati Cells			
Coordinator: Xiaojing YANG (杨晓静)					
10:30-11:00	Nan HAO	Dynamic Signal Processing by Transcription			
		Factors			
11:00-11:30	Yi-han LIN	Pulsatile Gene Regulation at the Single-cell			
		Level			
11:30-12:00	Qi WANG	In Vitro Reconstitution of B-cell Receptor			
		Proximal Signaling Network			
12:00-14:00	Lunch				
Afternoon Session					
Coordinator: Luhua LAI (来鲁华)					
14:00-14:30	Ying LV	Kinetic Analysis of Protein Degradation			
		Using Single-molecule Approaches			
14:30-15:00	Tao WU	Protein Engineering for the Study of			
		Protein Ubiquitination			
15:00-15:30	Qiang-feng	Enabling Techniques for Structural Systems			
	ZHANG	Biology			
15:30-16:00	Coffee Break				
Coordinator: Zhirong LIU (刘志荣)					
16:00-16:30	Lin JIANG	Structure-based Computational Approach to			
		Protein Aggregation Diseases			
16:30-17:00	Jing YAN	Dendrite Microtubule Polarity: Why and			
		How?			
17:00-17:30	Li-heng Cai	A Periciliary Brush Keeps the Human Lung			
		Healthy			
18:30	Welcome Dinner				

## Day 2 (June 24, 2014)

Time People Activities/Title  9:00-9:30 Hai-yuan YU Deciphering Human Disease Mutations Through the Atomic-Resolution Protein Interactome Network  9:30-10:00 Gang-qing HU Systems Biology Approach to Understanding Epigenetic Regulation of Mammalian Cells  10:00-10:30 Coffee Break  Coordinator: Chunxiong LUO (罗春雄)  10:30-11:00 Zheng-qing OUVANG Decoding RNA Regulation  11:00-11:30 Rui ZHANG Decoding RNA Regulation  11:30-12:00 Yu-ping ZHANG Integrating Diverse Genomics Data to Infer Biological Networks  12:00-14:00 Lunch  Afternoon Session  Coordinator: Lin JIANG (江林)  14:00-14:30 Jia-shun ZHENG Conservation of Quantitative Phenotype under Evolutionary Rewiring: A Case Study of Metabolic Regulation  14:30-15:00 Bin HE Evolutionary Loss of Transcription FactorCo-regulation: A Case Study in Yeast  15:00-15:30 Zheng-wei XIE Early Telomerase Inactivation Accelerates Yeast Aging by Elevating Oxidative Stress and Mitochondrial Dysfunction  15:30-16:00 Coffee Break  Coordinator: Jian-feng PEI (表到锋)  16:00-16:30 Dong-geng LUO Spontaneous Activity in Visual System  16:30-17:00 Tao HU Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation	<b>Morning Session</b>	on				
P:00-9:30	_					
Through the Atomic-Resolution Protein Interactome Network	Time	People	Activities/Title			
Interactome Network	9:00-9:30	Hai-yuan YU	Deciphering Human Disease Mutations			
Systems Biology Approach to Understanding Epigenetic Regulation of Mammalian Cells			Through the Atomic-Resolution Protein			
Understanding Epigenetic Regulation of Mammalian Cells			Interactome Network			
Mammalian Cells	9:30-10:00	Gang-qing HU	Systems Biology Approach to			
10:00-10:30   Coffee Break   Coordinator: Chunxiong LUO (罗春雄)     10:30-11:00   Zheng-qing OUYANG   Decoding RNA Regulation     11:00-11:30   Rui ZHANG   Decoding A-to-I RNA Editing Through   High-throughput Methods     11:30-12:00   Yu-ping ZHANG   Integrating Diverse Genomics Data to   Infer Biological Networks     12:00-14:00   Lunch     Afternoon Session   Coordinator: Lin JIANG (江林)     14:00-14:30   Jia-shun ZHENG   Conservation of Quantitative Phenotype   under Evolutionary Rewiring: A Case   Study of Metabolic Regulation     14:30-15:00   Bin HE   Evolutionary Loss of Transcription   Factor Co-regulation: A Case Study in   Yeast     15:00-15:30   Zheng-wei XIE   Early Telomerase Inactivation   Accelerates Yeast Aging by   Elevating Oxidative Stress and   Mitochondrial Dysfunction     15:30-16:00   Coffee Break   Coordinator: Jian-feng PEI (長剑锋)     16:00-16:30   Dong-geng LUO   Spontaneous Activity in Visual System     16:30-17:00   Tao HU   Efficient Coding can Account for the   Existence of Sustained-transient   Channels in Early Sensory Systems     17:00-17:30   Tong-li ZHANG   One Dynamical Scenario for   Chromosome Bi-orientation			Understanding Epigenetic Regulation of			
Toordinator: Chunxiong LUO (罗春雄)			Mammalian Cells			
10:30-11:00   Zheng-qing OUYANG   Decoding RNA Regulation     11:00-11:30   Rui ZHANG   Decoding A-to-I RNA Editing Through   High-throughput Methods     11:30-12:00   Yu-ping ZHANG   Integrating Diverse Genomics Data to Infer Biological Networks     12:00-14:00   Lunch     Afternoon Session   Coordinator: Lin JIANG (江林)     14:00-14:30   Jia-shun ZHENG   Conservation of Quantitative Phenotype under Evolutionary Rewiring: A Case Study of Metabolic Regulation     14:30-15:00   Bin HE   Evolutionary Loss of Transcription Factor Co-regulation: A Case Study in Yeast     15:00-15:30   Zheng-wei XIE   Early Telomerase Inactivation Accelerates Yeast Aging by Elevating Oxidative Stress and Mitochondrial Dysfunction     15:30-16:00   Coffee Break   Coordinator: Jian-feng PEI (製鋼棒)     16:00-16:30   Dong-geng LUO   Spontaneous Activity in Visual System     16:30-17:00   Tao HU   Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems     17:00-17:30   Tong-li ZHANG   One Dynamical Scenario for Chromosome Bi-orientation	10:00-10:30	Coffee Break				
11:00-11:30 Rui ZHANG Decoding A-to-I RNA Editing Through High-throughput Methods 11:30-12:00 Yu-ping ZHANG Integrating Diverse Genomics Data to Infer Biological Networks 12:00-14:00 Lunch Afternoon Session Coordinator: Lin JIANG (江林) 14:00-14:30 Jia-shun ZHENG Conservation of Quantitative Phenotype under Evolutionary Rewiring: A Case Study of Metabolic Regulation 14:30-15:00 Bin HE Evolutionary Loss of Transcription FactorCo-regulation: A Case Study in Yeast 15:00-15:30 Zheng-wei XIE Early Telomerase Inactivation Accelerates Yeast Aging by Elevating Oxidative Stress and Mitochondrial Dysfunction 15:30-16:00 Coffee Break Coordinator: Jian-feng PEI (裴剑锋) 16:00-16:30 Dong-geng LUO Spontaneous Activity in Visual System 16:30-17:00 Tao HU Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems 17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation	Coordinator: C	Chunxiong LUO (罗春雄)				
High-throughput Methods   Integrating Diverse Genomics Data to Infer Biological Networks     12:00-14:00	10:30-11:00	<b>Zheng-qing OUYANG</b>	Decoding RNA Regulation			
Titison   Number of the properties of the pro	11:00-11:30	Rui ZHANG	Decoding A-to-I RNA Editing Through			
Infer Biological Networks   12:00-14:00   Lunch			High-throughput Methods			
Tao Hu   Conservation of Quantitative Phenotype under Evolutionary Rewiring: A Case Study of Metabolic Regulation	11:30-12:00	Yu-ping ZHANG	Integrating Diverse Genomics Data to			
Afternoon Session Coordinator: Lin JIANG (江林)  14:00-14:30  Jia-shun ZHENG  Conservation of Quantitative Phenotype under Evolutionary Rewiring: A Case Study of Metabolic Regulation  14:30-15:00  Bin HE  Evolutionary Loss of Transcription FactorCo-regulation: A Case Study in Yeast  15:00-15:30  Zheng-wei XIE  Early Telomerase Inactivation Accelerates Yeast Aging by Elevating Oxidative Stress and Mitochondrial Dysfunction  15:30-16:00  Coffee Break  Coordinator: Jian-feng PEI (裴剑锋)  16:00-16:30  Dong-geng LUO  Spontaneous Activity in Visual System  16:30-17:00  Tao HU  Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30  Tong-li ZHANG  One Dynamical Scenario for Chromosome Bi-orientation			Infer Biological Networks			
Coordinator: Lin JIANG (江林)	12:00-14:00	Lunch				
14:00-14:30   Jia-shun ZHENG   Conservation of Quantitative Phenotype under Evolutionary Rewiring: A Case Study of Metabolic Regulation     14:30-15:00   Bin HE						
### Land  ### L	Coordinator: L	in JIANG (江林)				
Study of Metabolic Regulation	14:00-14:30	Jia-shun ZHENG	1			
Bin HE   Evolutionary Loss of Transcription FactorCo-regulation: A Case Study in Yeast     15:00-15:30   Zheng-wei XIE   Early Telomerase Inactivation Accelerates Yeast Aging by Elevating Oxidative Stress and Mitochondrial Dysfunction     15:30-16:00   Coffee Break			under Evolutionary Rewiring: A Case			
FactorCo-regulation: A Case Study in Yeast			Study of Metabolic Regulation			
Yeast   Early Telomerase Inactivation   Accelerates Yeast Aging by   Elevating Oxidative Stress and   Mitochondrial Dysfunction     15:30-16:00   Coffee Break	14:30-15:00	Bin HE	1			
Tao HU   Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems   Tong-li ZHANG   Condition   Cond			1			
Accelerates Yeast Aging by Elevating Oxidative Stress and Mitochondrial Dysfunction  15:30-16:00 Coffee Break  Coordinator: Jian-feng PEI (表到锋)  16:00-16:30 Dong-geng LUO  Spontaneous Activity in Visual System  16:30-17:00 Tao HU  Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation			Yeast			
Elevating Oxidative Stress and Mitochondrial Dysfunction  15:30-16:00 Coffee Break  Coordinator: Jian-feng PEI (装剑锋)  16:00-16:30 Dong-geng LUO Spontaneous Activity in Visual System  16:30-17:00 Tao HU Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation	15:00-15:30	Zheng-wei XIE	Early Telomerase Inactivation			
Mitochondrial Dysfunction     15:30-16:00   Coffee Break						
15:30-16:00 Coffee Break Coordinator: Jian-feng PEI (裴剑锋) 16:00-16:30 Dong-geng LUO Spontaneous Activity in Visual System  16:30-17:00 Tao HU Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation			1			
Coordinator: Jian-feng PEI (裴剑锋)  16:00-16:30 Dong-geng LUO Spontaneous Activity in Visual System  16:30-17:00 Tao HU Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation			Mitochondrial Dysfunction			
16:00-16:30 Dong-geng LUO  Spontaneous Activity in Visual System  16:30-17:00 Tao HU  Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG  One Dynamical Scenario for Chromosome Bi-orientation	15:30-16:00 Coffee Break					
Spontaneous Activity in Visual System  16:30-17:00  Tao HU  Efficient Coding can Account for the Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30  Tong-li ZHANG  One Dynamical Scenario for Chromosome Bi-orientation	Coordinator: Jian-feng PEI (裴剑锋)					
Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation	16:00-16:30	Dong-geng LUO	Spontaneous Activity in Visual System			
Existence of Sustained-transient Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation	16:30-17:00	Tao HU	Efficient Coding can Account for the			
Channels in Early Sensory Systems  17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation						
17:00-17:30 Tong-li ZHANG One Dynamical Scenario for Chromosome Bi-orientation			1			
Chromosome Bi-orientation	17:00-17:30	Tong-li ZHANG	†			
18:30 Dinner			1			
	18:30	Dinner				

## Day 3 (June 25, 2014)

Morning Session				
Coordinator: Chao TANG (汤超)				
Time	People	Activities		
9:00-9:30	Qiong YANG	From Molecules to Development:		
		Revealing Simple Rules of Biological		
		Clocks.		
9:30-10:00	Cong-hui YOU	Coordination of Bacterial Proteome with		
		Metabolism by cAMP Signaling		
10:00-10:30	Coffee Break			
Coordinator: Gang-qing HU (胡岗清)				
10:30-11:00	Fang-yuan DING	Single Molecule Mechanical Sequencing		
11:00-11:30	Ping WEI	Using Synthetic Biology Approach to		
		Reprogram Eukaryotic Signaling		
		Networks		
11:30-12:00	Feng-zhu XIONG	Systems Biology of Development:		
		Combining Live Imaging and		
		Theoretical Models		
12:00-14:00	Lunch			
14:00-17:00	<b>CQB</b> site visiting (Integrated Science Research Center, 4 <sup>th</sup> Floor)			
	Informal Discussion (Rm. 426, 4th floor of ISRC)
